Put Oportunity Finder

Scan short put opportunities around the lower band using delta and credit filters.

| Conservative | Normal | Aggressive | Custom |

Control Panel

Ticker

Base expiration (YYYY-MM-DD)

Max Delta (abs)

Min Cedit (%)

Distance from lower band (+_ point)

Number of future expirations (weekly steps) 1=Base Only, up to 3 total

☑ Show neighbors
☐ Live update (auto-refresh)

Load opportunities   **Factory defaults**

Auto-refresh uses the last search parameters. Turn it off if you want to "freeze" the snapshot.
